SINK & TAP SPECIFICATION MANUAL

Adding a layer of luxury to your developments

WHY CHOOSE ABODE?

We are truly passionate about what we do and this is reflected through our ranges.

The Abode team have extensive experience and knowledge when it comes to kitchen sinks and taps. Our teams are dedicated to delivering the absolute best in performance and service in every aspect of what we do.

Established in 2002 our thirst for design, innovation, quality and service remains just as strong today as it was on day one.

Abode products add a layer of luxury to your developments, giving you the options to suit the development in hand.

From Regulation 4 approved hot water taps, taps in distinctive finishes and perfectly paired sinks with fast fit options. We have dedicated representatives with whom can discuss your requirements to ensure the optimum selection to meet your objectives is met every time.

Abode is part of Norcros PLC.

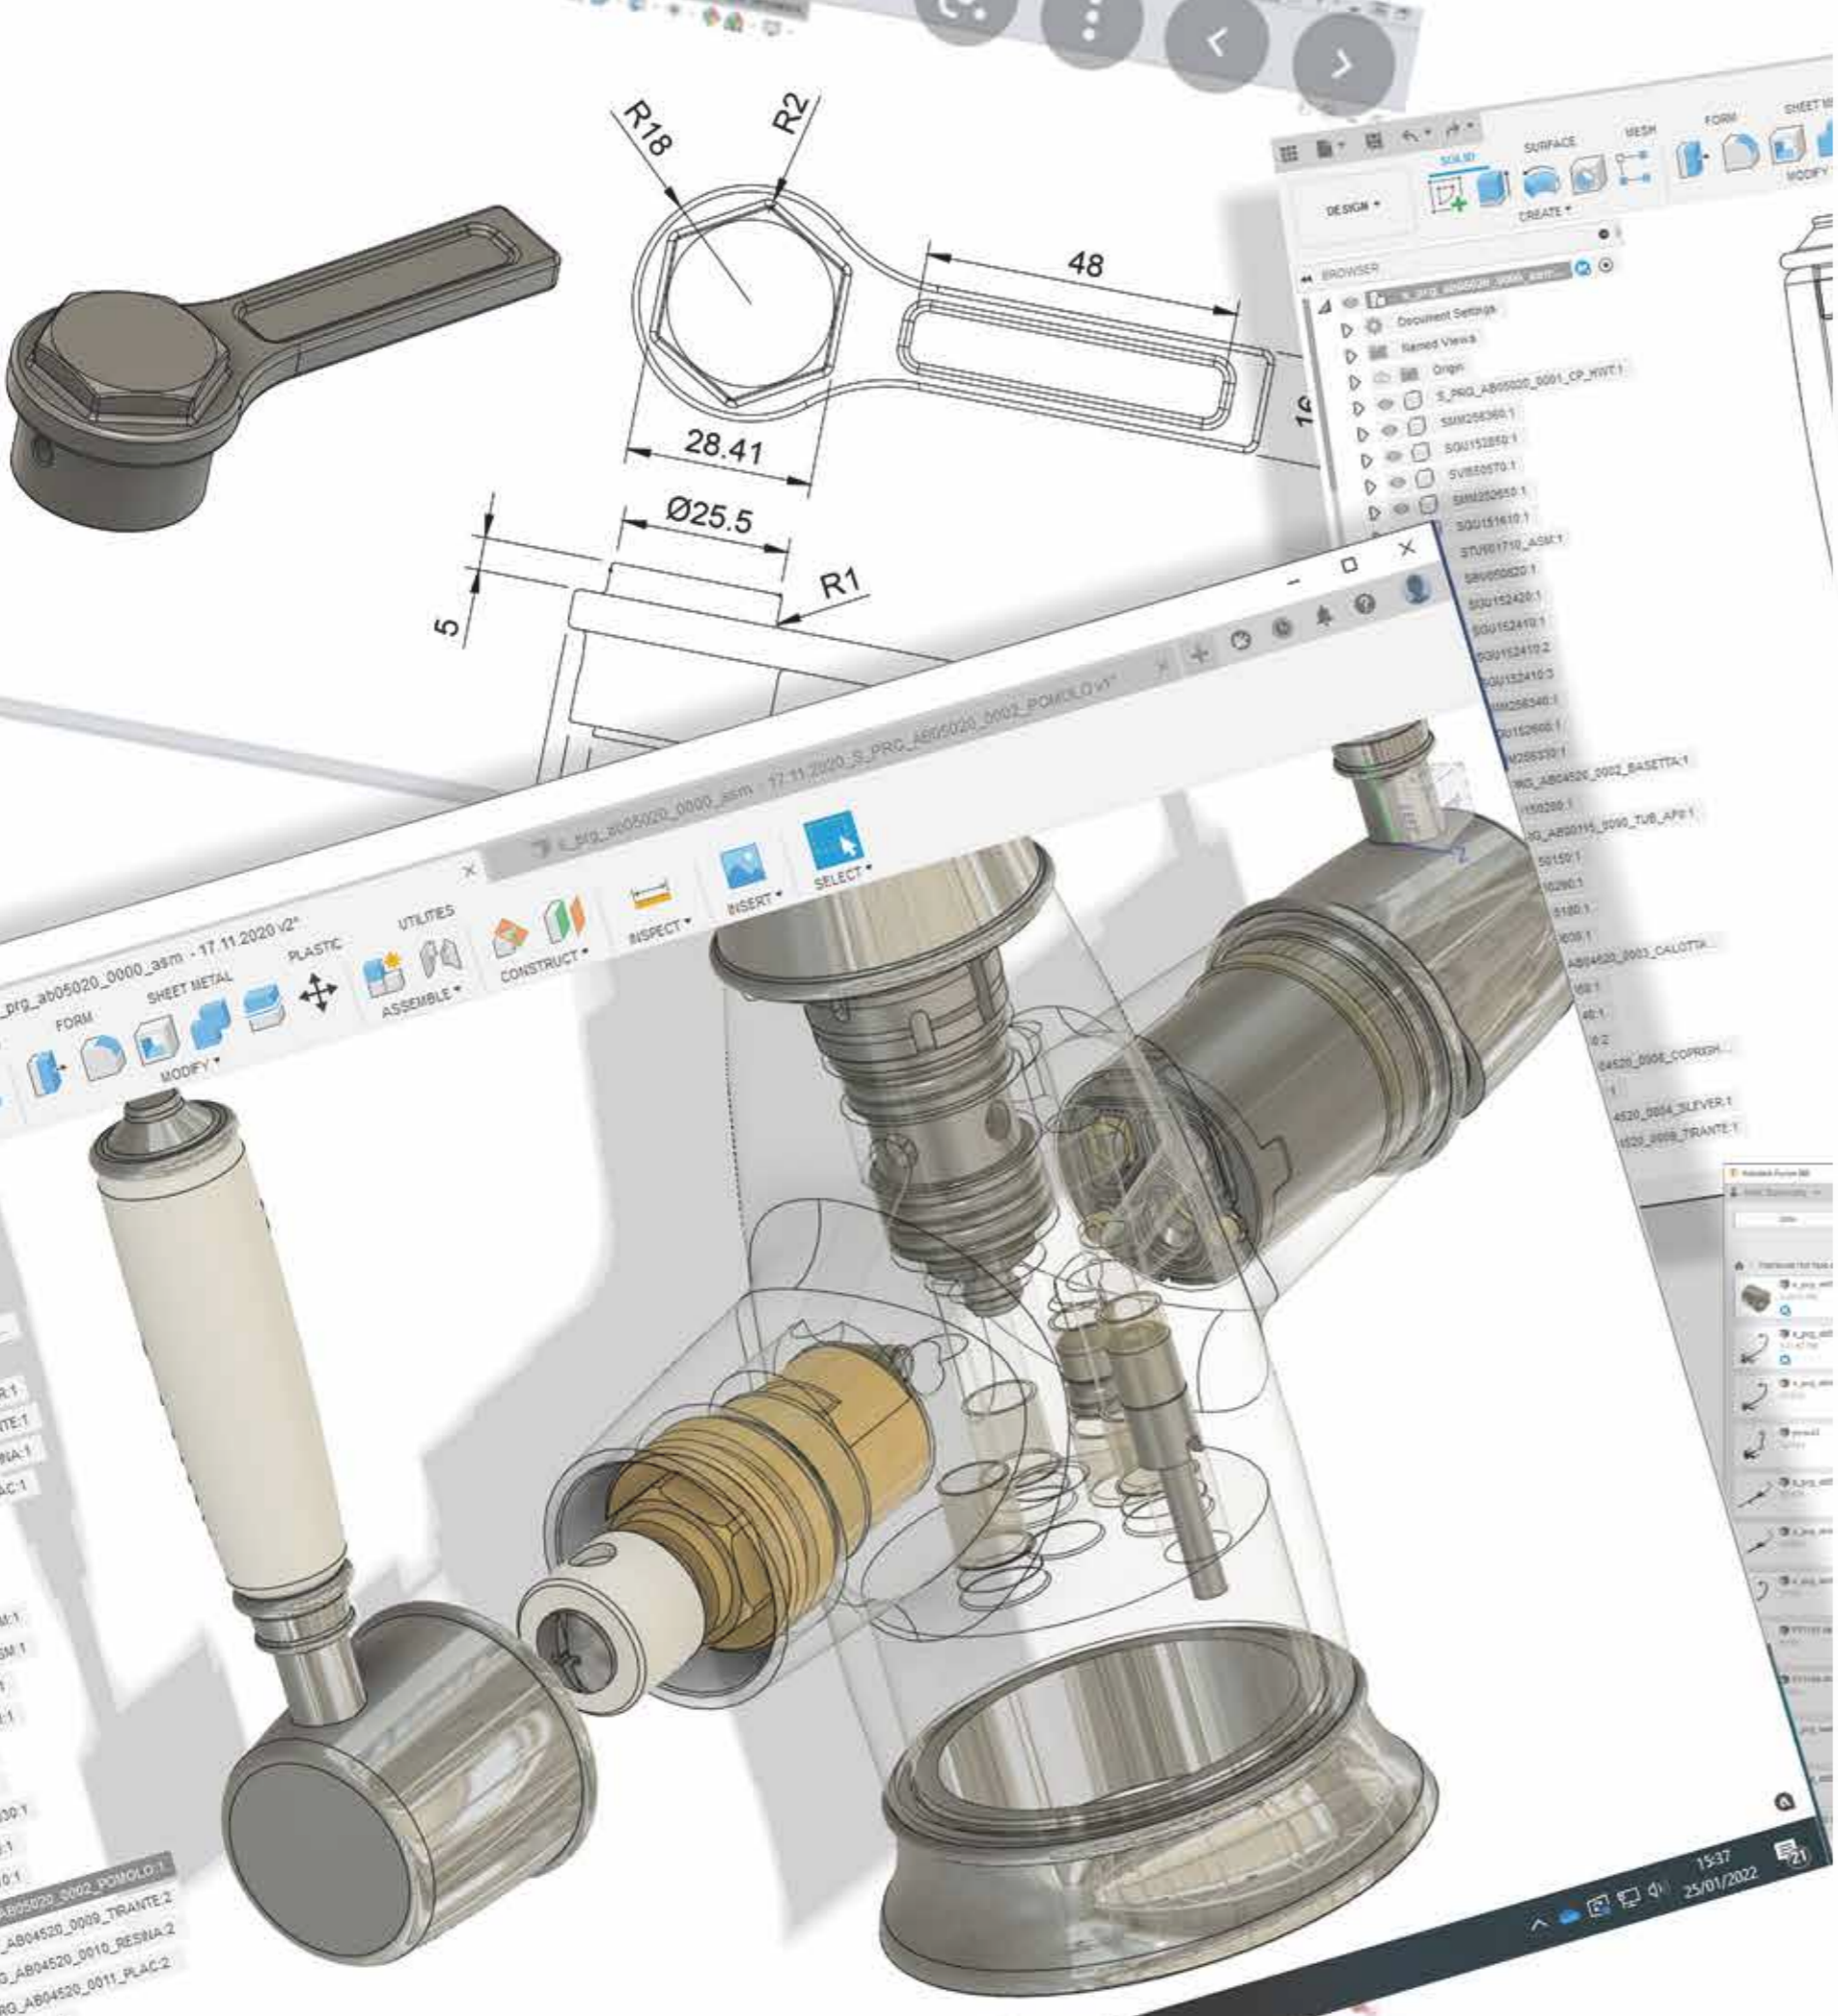

Norcros is a market leading supplier of high quality and innovative bathroom and kitchen products.

We have a well established, successful track record of serving consumers, architects, developers, retailer and wholesalers. Our emphasis is on strong branding, contemporary designs, trusted quality, outstanding service, innovations and breadth of range. We base our business on understanding our customers' needs. Norcros is a substantial group with consistent, high quality standards and considerable resources. We invest significantly and continuously in our people, brands, product development and processes and we aim to develop our business in both the quality of our products and the scale of our activities.

abode

WHAT MAKES US TICK?

DESIGN, INNOVATION, QUALITY & SERVICE

Buying Abode means complete peace of mind. We have strict quality standards, investing in the very best components and latest manufacturing techniques to ensure long-life performance across our product portfolio.

We are so confident in the quality of our products that they carry a comprehensive warranty on defective material or workmanship. On top of that, our team are dedicated in providing superior customer service should you need us.

Innovation is at the heart of everything we do, and we do it with passion. Our product design team take projects from concept to completion through a carefully mapped process, ensuring we deliver the right products, at the right price, at the right time.

We can maintain speed to market by controlling our design agenda in the UK. We identify the trends, design and approve to ensure the demands of the market are met and the right products can make their way to the centre of your latest projects when you need them.

We are renowned for award winning product design and have been recognised by various industry awards.

QUALITY ASSURED

REST ASSURED WHEN YOU SPECIFY ABODE PRODUCTS. WE IMPLEMENT THE STRICTEST QUALITY STANDARDS FOR OUR PRODUCTS.

Taps:

- Designed to EN200.
- All models in this brochure are 3rd party approved by KIWA and/or WRAS.
- Plated to EN248 standards.
- Our brand taps undergo extensive quality testing including the following:
 - Ceramic disc valves tested for 200,000 cycles
 - Robotic production of parts for complete precision
 - 100% end of line testing
- Our sophisticated hand polishing, plating, powder coating and lacquering techniques are put through thorough testing to ensure optimum performance. This includes:
 - Salt spray testing for 100 - 200 hours
 - Surface resistance tests for 200 cycles using varying corrosives (acids, alcohols etc.)

Sinks:

- All sinks are approved to EN13310, conforming to CE and UKCA requirements
- Pipework and wastes are supplied with all Abode branded sinks and they conform to EN695.
- All Stainless Steel sinks are made from 304 grade stainless steel.

Proboil boilers:

- Our hot water product comply with LVD/EMC/RoHS standards according to CE and UKCA.
- All Proboil boilers either have WRAS certification or are in preparation for approval.

General:

- All manufacturing partners are ISO9001 approved.
- Principal manufacturing partners are either ISO14001 approved or have approval underway.
- Principal manufacturing partners are either SMETA approved or have approval underway.

All products should be installed in accordance with Local Water By Laws.

All information in this brochure was correct at the time of printing. Please check approval status before specifying a product.

All kitchen taps listed in this brochure held current WRAS/KIWA Regulation 4 approvals at the time of printing or were in the process of certification.

PROBOIL.2X

A RANGE FOR EVERY PROJECT AND BUDGET

The Pronteau by Abode collection features a range of WRAS/KIWA approved steaming hot water taps that have been designed to fit seamlessly into an array of kitchen designs. All components of our hot water tap systems have WRAS approval which we know is an essential accreditation for you and demonstrates our commitment to designing compliant products only in this category. We continue to develop and improve our offer, with new product designs underway each year so check in with us for our very latest offer.

abode
distinctly

Our most aspirational and unique kitchen tap designs, the premium designs on which the Abode brand was formed. This range consists of our latest innovative design forms, in an array of special finishes. The products that will inject the WOW factor into any kitchen.

abode

A range offering a broad array of design options with special finishes available on many of the ranges. The products in this range offer affordable style whilst maintaining the Abode quality promise, ensuring the perfect finishing touch and complete peace of mind.

CHOOSING THE RIGHT STYLE FOR THE JOB

Contemporary Single Lever Taps

With a variety of benefits, the single lever tap is a popular choice for many. Single lever mixers use less water than a monobloc as it takes less time to adjust the temperature to the right level. This makes them a more energy efficient choice, and with several sleek and streamlined designs available you're sure to find the perfect option.

Stainless Steel Taps

Stainless steel as a material has several well loved benefits including:

- It is a closer match to stainless steel sinks and appliances
- The material itself is 100% recyclable
- Stainless steel taps have no coating, they are just polished and brushed
- It is more durable and less likely to scratch, small scratches can be brushed out
- Stainless steel is a naturally hygienic material

Contemporary Dual Lever Taps

A monobloc allows complete symmetry for some of the most elegant tap designs.

Function and design are perfectly balanced in this range, with an array of classic and contemporary options, allowing you to choose something minimalist or something truly eye-catching.

Traditional Taps

Inspired by the classic era of British design and manufacturing, this refined selection of traditional mixertaps are the perfect pairing for shaker style cabinetry.

Pull Out & Professional Taps

The range consists of two different types of pull out tap; a true pull out and a pull around tap. On a true pull out, the hose is discreetly hidden inside the tap and allows the user to pull the hose out to its full set length. A pull around tends to be a professional style tap in which the hose is visible on the external of the tap and held in a handspray holder located on the end of the extension bar.

PRONTEAU™
by abode

Steaming Hot Water Taps

Useful technology is fast becoming the norm in the modern kitchen, with hot water taps being firmly among their number. Homeowners are increasingly looking for additional functionality from the kitchen tap, in the same way as they are appliances. Steaming hot water taps fulfil a need and have a range of benefits. See pages 12-15 for more information about Pronteau by Abode steaming hot water taps.

Water Filter Taps

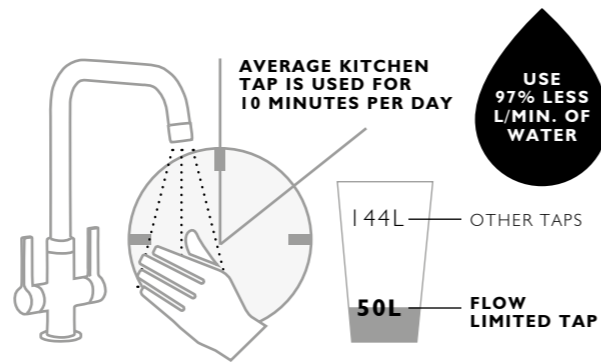

The Abode Aquifier range features popular designs from our tap range as well as exclusive designs with the added benefit of a dedicated filtered water function – straight from the tap. All products are supplied with a WRAS approved filter.

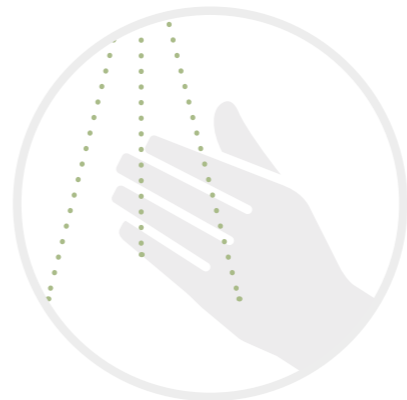

THE ONLY RESTRICTION YOU SHOULD EVER NEED

ENGINEERED TO WITHSTAND!

All our flow limited taps have been extensively tested and had components beefed up to withstand the extra stresses flow restriction creates.

FLOW LIMITED TAPS

There are several UK regulations which all stipulate differing requirements for the flow limitation rate.

Building Regulations (Part G2) provide the standard law in force. Taking their guidance is how we have shaped our flow limited offer, our view is that flow limited taps should be 5LPM to comply with the maximum number of regulations. Accordingly, a tap which is limited to 5LPM will cover all schemes, no other flow rate should be needed.

WHY CHOOSE A PRONTEAU BY ABODE STEAMING HOT WATER TAP?

PRONTEAU™
by abode

WRAS APPROVAL PENDING

- Added convenience - save worktop space and time.
- Inject luxury with designs that sit perfectly in the kitchen designs of today.
- Water saving and a more environmentally friendly choice.
- Streamline the kitchen and add an instant talking point.
- Especially good in hard water areas.

1. Adding a Pronteau to the kitchen is guaranteed to make a difference and leave the user thinking how they ever got by without a steaming hot water tap.
2. Homeowners today crave those little added luxuries that can make such a difference to their daily life. Pronteau by Abode is a perfect example of that and with award winning, design leading styles on offer the product will take pride of place in any kitchen design.
3. As there is no need to fill the kettle every time a hot drink is made or a pan is to be filled, your customers will find that water and energy wastage in the household is minimal. Our filters are also 100% recyclable, a service managed by Abode.
4. Free up worktop and fridge space of kettles and filter jugs for clutter-free worktops and that extra fridge space that we often find ourselves needing. Demonstrate the working product to potential buyers for an added talking point.
5. Are you in a hard water area? Each time steaming hot water is dispensed it runs through the innovative Proboil filter, removing limescale which can often cause an unpleasant hot drink. Enjoy great tasting hot drinks every time.

4 IN 1

domestic cold, domestic hot, filtered cold and filtered steaming hot water

Style

A variety of models, styles, popular finishes and boiler sizes allow you to tailor your experience of Pronteau hot water taps to ensure you get the right model for your household.

We have most recently launched our Slimline Prothia 3 IN 1 hot taps, to sit alongside the popular Prostream and Prostyle models. With another five ranges currently pending WRAS approval we're confident that Pronteau by Abode is the choice for developers seeking design flair as well as functionality. Not only that, our latest 4 IN 1 mechanical range, Propure offer hot and cold domestic supply along with filtered steaming hot and filtered cold drinking water.

Why 98 degrees?

When we developed our innovative range of steaming hot water taps for launch in 2016 we took into consideration every aspect of safety, not only for the dispensing of the steaming hot water but also the maximum temperature requirements for the stored water in the boiler. This is the main reason our products store water to a maximum temperature of 98°C, this makes our product fully compliant with Part G(3) of the UK Building Regulations, and all Pronteau taps, boilers and filters are WRAS approved or WRAS pending.

STEAMING HOT WATER TAPS

PRONTEAUTM
by abode

The HotKey® Collection

STEAMING

All products in the HotKey® collection offer 4 functions; steaming hot filtered water, refreshing filtered cold water and everyday hot and cold water.

STYLISH

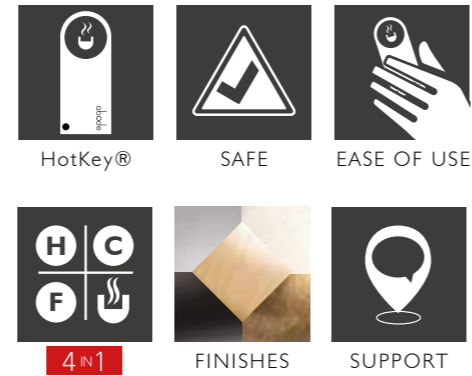

The HotKey® collection offers an array of stylish designs in a range of finishes; Chrome, Brushed Nickel, Matt Black, Antique Brass and Brushed Brass.

SAFE

The patented Pronteau HotKey® technology could just be the safest way to dispense steaming hot water.

Without the HotKey® the steaming hot water cannot be activated, hide it up high away from little ones and the tap will only perform as a 3-way mixer tap.

As well as this safety benefit, this tap is also great for anyone with dexterity difficulties or conditions such as arthritis where pushing down, turning and sliding may be more complicated.

SELECTING A SINK

MATERIAL

STAINLESS STEEL: Stainless Steel is a timeless material which remains a popular choice. It is often a perfect match to the kitchen appliances so provides a coordinated finishing touch. As well as the aesthetics, it is easy to maintain and is extremely durable. All Abode sinks are constructed from premium 304 grade stainless steel and are available in an array of designs.

GRANITE: SiOForm® is a unique material solution engineered specially for our granite kitchen sink collection. The material is primarily made of pure and natural quartz which makes it very strong and durable, perfect for the kitchen environment. SiOForm® products have a uniform void-free structure and are resistant to dry temperatures up to 280°. Granite sinks also retain the water temperature in the bowl better than stainless steel. Our range consists of several unique designs in various shapes and sizes. In addition, the white, grey and black colour options offer a contemporary styled solution to create a striking focal point in the kitchen.

SiOForm® is available in the following colours:

CERAMIC: Our ceramic sinks are constructed from the finest grade fireclay and are hand finished for a premium quality finish. This traditional classic is available in undermount, apron front and inset options, providing an elegant finish every time. The glazing process ensures a long lasting and durable finish.

All Abode sinks are supplied with wastes and pipework in the box (unless we have a sleeved option available, these variants are not supplied with pipework to remove cost - please speak to an Abode representative for options).

- AX2506 System Sync Flex Rack

From the *Micro* to the *Mega*

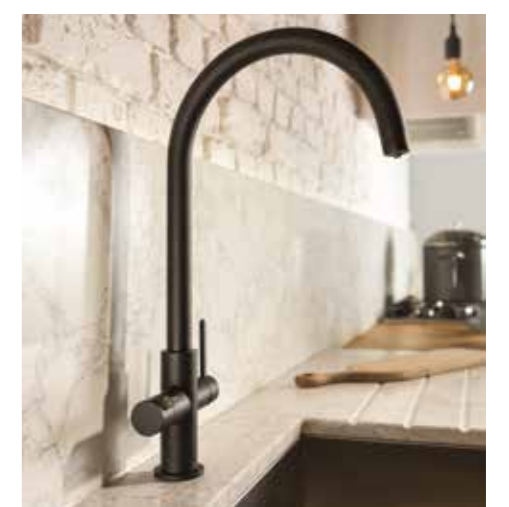

Open up a world of possibilities and build your perfect sink solution with System Sync, allowing you to create a customisable, smart solution for all kinds of spaces, from the small to the spacious.

SO WHAT'S
IMPORTANT
ON YOUR
SPECIFICATION
CHECKLIST?

- 
WATER SAVING: We have a range of products which are available in flow limited options. Limited to 5LPM for a significant reduction in water consumption.
- 
WATER QUALITY: An Aquifier tap or 4 IN 1 steaming hot water tap filters particulates from water, reduces the taste and odour of chlorine and reduces hardness from the water.
- 
HEALTH: Having filtered cold water on tap will hopefully encourage the consumption of more water. Fill a reusable water bottle each day directly from the tap.
- 
ENVIRONMENT: By removing the need for bottled mineral water, every home with an Aquifier product or 4 IN 1 hot water tap is doing their bit for the environment by reducing single use plastic consumption.
- 
COST: If bottled mineral water is a frequent purchase in your household you can save considerable amounts each year by switching to an Aquifier or Swich product.
- 
SPACE SAVING: If you previously had a water filtration jug or bought bottled water, just think how much space you can free up in the fridge.
- 
APPLIANCE HEALTH: If you're in an area with particularly hard water you will notice that the kettle suffers as a result of the limescale build up over time. Fill your kettle with filtered water and prolong its life.

abode

PRONTEAUTM
by abode

If space is of a premium we have multi-functional compact sinks which can be fit either horizontally or vertically as the space allows and our Studio sink comes with 3 accessories allowing the sink to double up as a hard working task area.

Pair the sink with the slimline Prothia steaming hot water tap or Althia single lever tap for the perfect combined compact solution.

This is also a great combination for larger kitchens which call for a second sink.

As priorities and our way of living changes, people are spending more time at home and buyers are looking for luxury elements within their home.

Consider upgrades such as a standard tap to steaming hot water tap, water filter tap or professional/pull out tap to add extra talking points which could make all the difference.

Ease of fitting

FAST FIT
PREMIUM FINISH*

MATRIX R15

An undermount sink provides a sleek, premium finish, but you're limited to timely, precision solid surface installations.

The Matrix R15 range allows for a low profile INSET installation to give the premium look with a considerably quicker installation time.

With no minimum fitting depth for an inset installation and everything included in the box this is your go-to sink for fast-fit installation.

Get the undermount look in half the time with the Matrix R15 offer.

Once the cut out is done when installing this product inset mounted, the install should take no longer than 15-20 minutes by using fast fit clips to position and secure the sink in place.

Using this inset installation method whilst maintaining a high end undermount look ticks all of the boxes for many of our customers.

Trend Focus

Abode offer an array of tap styles and functionality across their design leading portfolio, with many options available in an array of special finishes. We hope you find something that ticks all the boxes.
