Here's the story behind the name

Established in 2002 we are a UK based company who design and engineer innovative bathroom and kitchen products.

We invest in the very best components and manufacturing processes and are so confident in the quality of our products that they carry a comprehensive five year warranty.

We're passionate about what we do. For some we are a hidden gem discovered for the first time, for many we are there in the background providing unrivalled design, quality and service to rely on.

Our thirst for innovation, design, quality and service continues to remain as strong as it did at our company birth so why not come in and take a look.

Keep up to date with the very latest product introductions, news and find a wealth of inspiration from our pages below:

WHY ABODE BATHROOMS?

Pure Simplicity –

our complete product families mean everything is in one place, keeping it as simple as possible for you to create perfectly coordinated bathroom spaces.

Complete collections –

across many of our premium collections we offer complete bathroom solutions including basin mixers, bath fillers and showering solutions, and don't forget the matching wastes.

Quality & Performance Assurance –

we use the finest, premium quality components in our products to give you peace of mind for years to come. Such is our dedication and reputation for quality, we offer a comprehensive 5 year warranty across our product portfolio.

Distinctly Exclusive Designs –

our luxury collections are handcrafted in Italy and brought to you exclusively by Abode. These unique, premium designs cannot be found elsewhere in the UK and will be sure to create the most stunning focal points in your bathroom for many years to come.

If you need help from here, our dedicated sales team can help with any queries you may have.

DESIGNED FOR YOU

A haven providing an escape from a hectic lifestyle, a place for wellness to relax and unwind or a practical space to get ready, these are all ways in which the bathroom is now used.

No matter how you use your bathroom, here at Abode we strive to ensure our bathroom ranges provide the perfect balance of style, performance, function and sheer quality.

PRODUCTS YOU CAN RELY ON

All our products are sourced with the finest ingredients. Whether that's the valves, cartridges, aerators, flexible hoses, the brass we use or the finish we coat our products in, rest assured, we're keen on style AND substance.

WATER EFFICIENCY

We recognise we all have a responsibility to do our bit towards water saving, so you can choose to add one of our flow limiters to your order to reduce water usage. We have a selection of inlet and outlet flow limiters which can be used with our products, regulating the flow to a maximum of 3, 4 or 6 litres per minute. Alternatively, opt for a flow restriction aerator which will regulate up to 3.8 litres per minute... the choice is yours.

LUXURY PACKAGING

After taking all this care with the product, we want to ensure they reach you in perfect condition with all the parts that you will need for a seamless and straightforward installation.

COMPREHENSIVE WARRANTY

Should you experience issue our dedicated customer service team are on hand to help.

For more details please refer to page 138.

Choosing the right Brassware

1 STYLE 2 FINISH 3 WATER PRESSURE 4 NUMBER OF TAP HOLES 5 WASTES

Style

When planning your bathroom you'll begin building a picture of what it will look like before the project starts. You will decide whether to have a bath or a shower, or both, what style of basin you would like and you'll have an idea of the space in the room and how you can make the best use of it.

At this early stage it is important to consider the style of brassware you would like to best compliment the overall design of your bathroom.

Choose from contemporary style taps with ultra-smooth single lever control for ultimate ease of use and comfort. Or opt for a more traditional style with crosshead handle or pillar style.

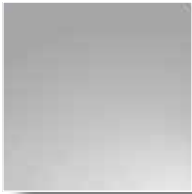

Finish

Finishes can often get left until one of the last considerations when planning a bathroom. However, they have such an impact on the overall look and feel of the space, they should be a key consideration from the beginning.

For this reason, the latest product offers from Abode are available in special finishes such as Antique Brass and Matt Black, as well as versatile Chrome.

Whether your bathroom design is modern or traditional, these luxurious finishes are sure to provide the perfect on-trend finishing touch to your bathroom, making it a stand out room for years to come.

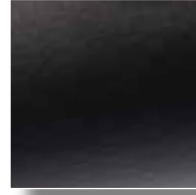

Chrome

Chrome is the most versatile finish, adaptable to complement modern and traditional schemes alike and available across the whole Abode brassware and showering portfolio. Find the perfect finishing touch for your bathroom and be confident that the mirror-like gleam will stand the test of time.

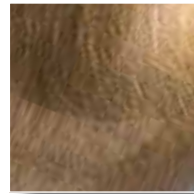

Matt Black

Whether you want to create a monochromatic masterpiece or a stunning Scandi statement, our beautiful powder coated Matt Black will not disappoint. This finish provides a harmonious touch alongside dark surfaces or a contrasting piece with muted tones. Find this finish on our Harmonie brassware and showering collection.

Antique Brass

Antique Brass will add instant warmth to your bathroom. The perfect complementing touch for traditional marble bathroom schemes or a great contrasting piece. Find this exquisite finish on our NEW Kite range & the Serenitie range.

Water *pressure*

To avoid disappointment in the early planning stages it is important to identify the existing plumbing system in place in your home, from this you can determine your water pressure.

If you have low water pressure you should take care to choose a product that is suitable, otherwise you may not receive the best possible performance from your chosen brassware or showering product. If you have high water pressure you can choose any product with the same or lower pressure requirement.

All products in this brochure are marked with a minimum pressure requirement to help you select a suitable product.

(see page 136 for our water pressure guide)

Number of Tap holes

When choosing a basin it is important to have an idea of the style you want to achieve to ensure it is paired to work with your desired brassware solution.

Most basins come with either 1, 2 or 3 tap holes or you can have a countertop basin or under counter basin which allows for a wall mounted brassware solution or counter top mounted solution. Bath taps can be deck mounted (with or without a shower handset), wall mounted, floor standing or you can opt for an overflow filler for a really streamlined look.

If space is at a premium or the tap is for a cloakroom we also have a collection on mini basin mixer taps to choose from.

Does your basin have an overflow? If so you'll need a slotted waste.

We have matching basin and bath wastes for our Harmonie Matt Black and Serenitie Antique Brass ranges to ensure a perfectly paired complete solution for your bathroom.

Or why not consider a bath overflow filler for streamlined simplicity and a touch of luxury.

HARMONIE

TURNING HEADS You will never tire of relaxing in your bathroom with Harmonie taps and showers. True to form, the range offers a simple minimalist design ensuring that it will be a welcome addition to every interior scheme. With a broad range of options, installation possibilities are endless. Perfectly matched shower valves make for seamless coordination into the shower area and the panel valves allow for use of a bath overflow-filler; a clever and stylish way of filling your bath without the need of a traditional spout outlet.

SHOWERING

The Abode showering collection consists of a range of shower valves, showerheads and accessories that are perfectly paired to sit alongside our brassware collections. Designed to not only look the part but to offer superior performance, giving you the best start to the day or to help wash away the strains at the end.

Selecting a Shower that's right for you

TO CONCEAL OR NOT TO CONCEAL?

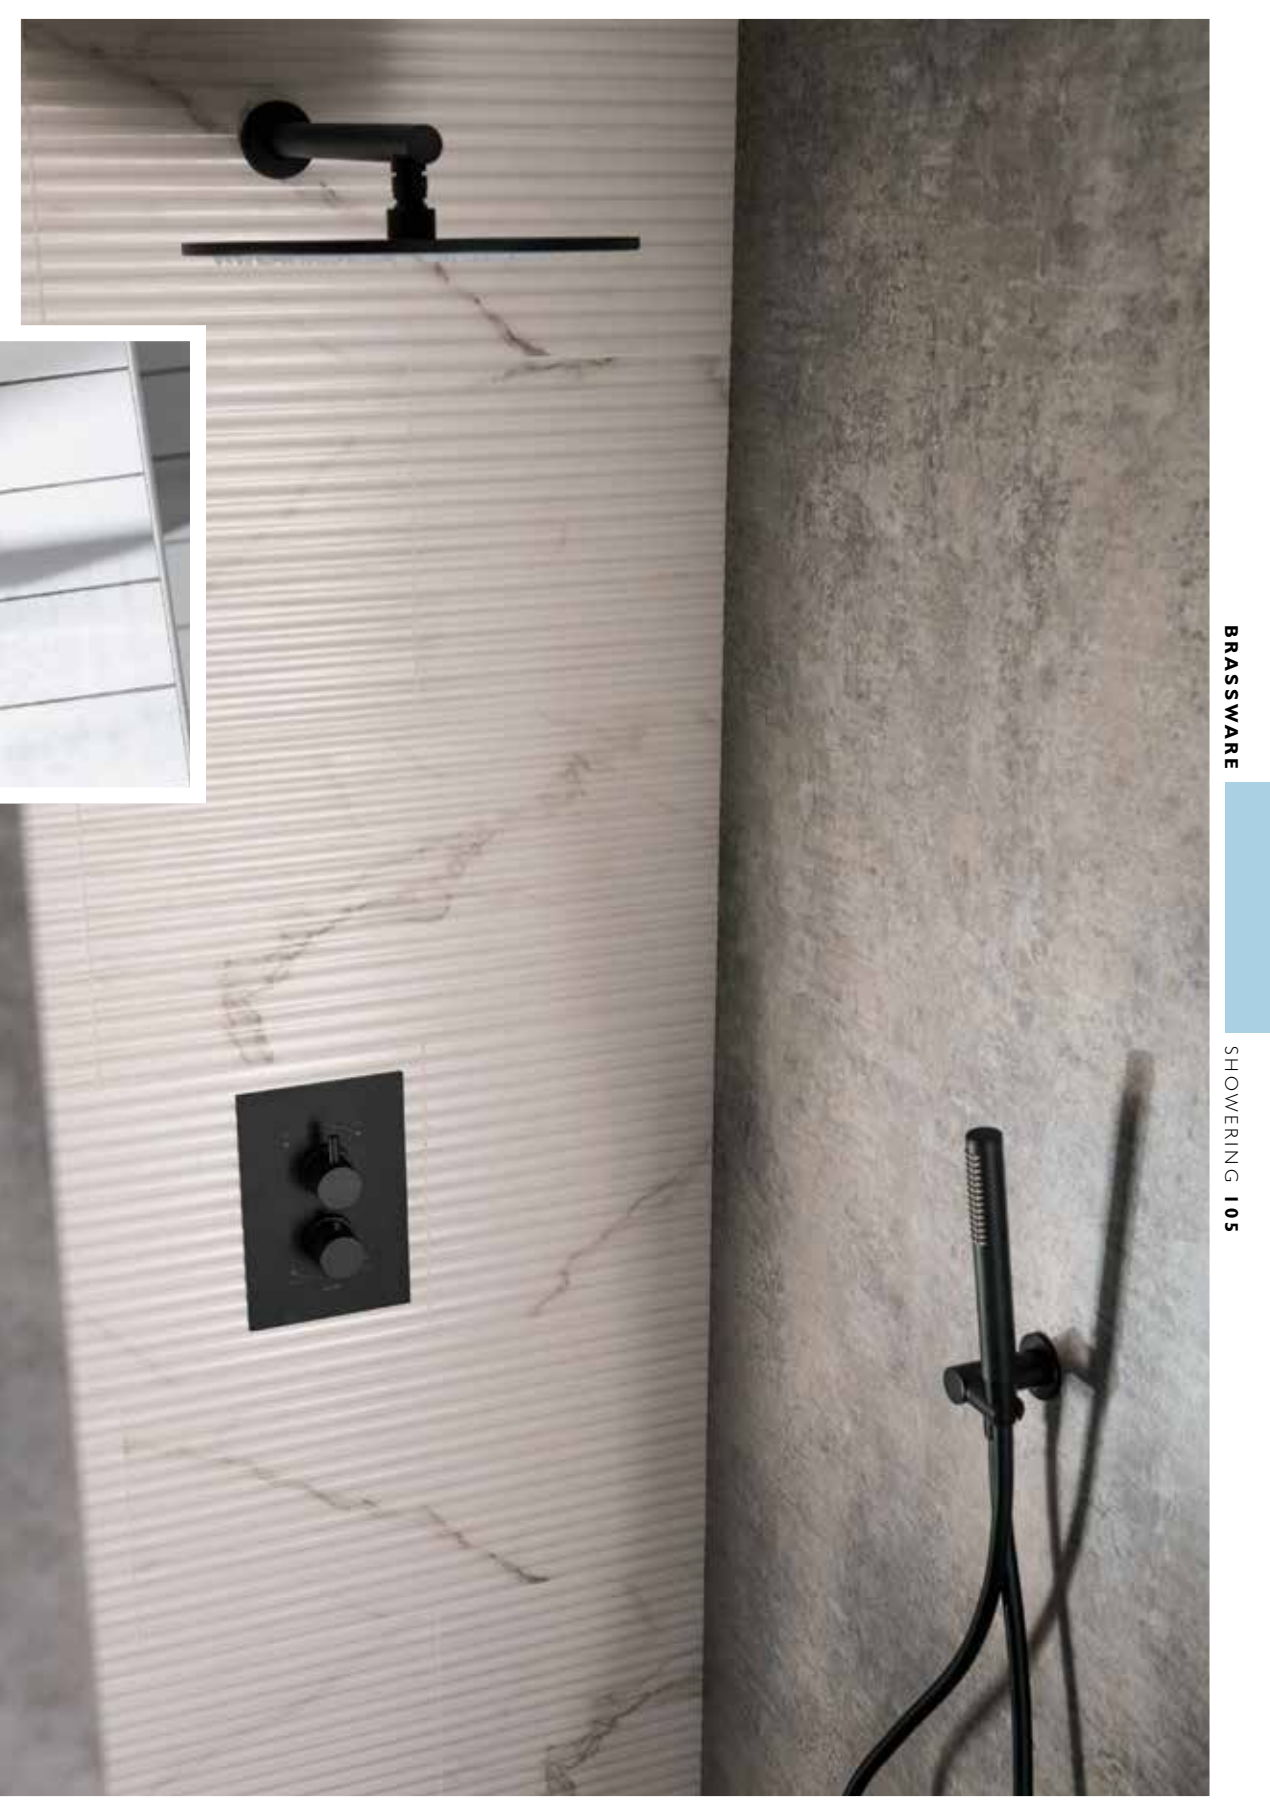

We have a wide range of beautiful concealed showers and a number of exposed options, but what does that mean and which one should you opt for?

Concealing is the sleekest, most aspirational choice, but you'll need to check with your installer that you have the required wall depth and suitability*. Or factor in the changes that will be needed. Concealed essentially refers to all the plumbing connections set behind the wall. With that in mind it's really important you purchase from a trusted brand and use a reputable installer.

Exposed showers are typically easier to install and can therefore work out cheaper, once installation costs are factored in. As you might have guessed the plumbing connections are above the tiled surface.

*all technical details are held on our website.

Shower *in style*

The Abode range of showers and accessories are designed to give you the best possible start to each day or to ease away the strains at the end. Whatever your preference we want to ensure you do it in style.

CREATING YOUR OWN SHOWERING SOLUTION

When you start thinking about your showering requirements, think about how you will use the space, who will use it and importantly how do you want it to look.

YOU'LL NEED TO CONSIDER:

- How many outlets are needed?
- Do you want an exposed or a concealed shower valve?
- Will your shower head be wall or ceiling mounted?
- Is a riser rail needed?

Selecting the right Shower Valve

HOW MANY OUTLETS ARE NEEDED?

In order to help you select the right shower valve for your needs, detailed below are the four main types of thermostatic shower valves you can choose from, with some brief detail explaining their features so you can be sure you choose the one that suits your needs best.

2 HANDLE – 1 EXIT

A lower pressure option with single outlet control.

The top handle controls the water flow and the bottom handle controls the water temperature.

2 HANDLE - 2 EXIT

Allows for the control of 2 separate outlets.

The top handle controls the water flow via a diverter between the two outlets and the bottom handle controls the water temperature.

e.g. rain shower and handshower

3 HANDLE – 2 EXIT

Allows for the option of two independently controlled outlets, which can be used simultaneously or separately.

A lower pressure alternative, perfect for the addition of a handshower to sit alongside your overhead shower.

3 HANDLE – 3 EXIT

Allows for the control of 3 separate outlets of which 2 can be operated simultaneously.

A perfect solution for the addition of a handshower and bath filler to sit alongside your main overhead shower.

Our concealed showers are manufactured to exacting standards for lasting lustre and faultless operation. With all metal handles and metal wall plate, on the surface that's clear.

But let's be upfront about what's behind the wall, because it's important.

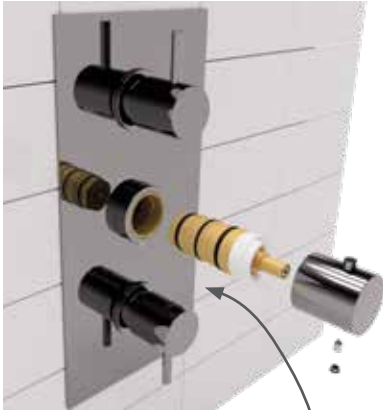

We've put a lot of thought into the bits-behind-the-wall, that you might not even get to see.

HERE'S WHY YOU SHOULD CHOOSE ABODE CONCEALED MIXERS...

- ✓ Quality European Vernet thermostatic cartridges, factory set to 38°C and tested to EN1111
- ✓ European Ceramic Disk Technology to ensure continued, slickly smooth operation
- ✓ Robust, pressure tested brass castings
- ✓ All our concealed showers are 100% end of line water tested
- ✓ Made in Italy. The home of premium brassware.

ADDITIONALLY...

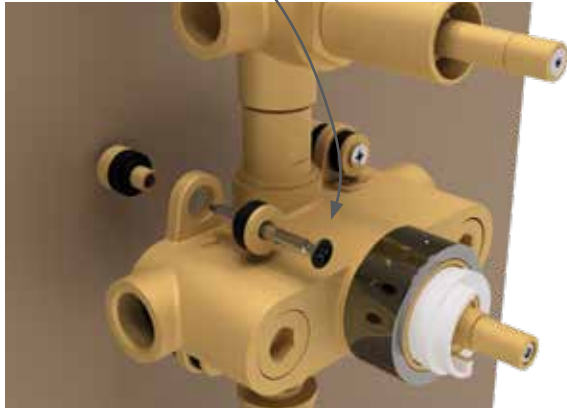

Accessible particle filters. These protect the ceramic technology and can be routinely cleaned to keep your showering experience drenching.

Should you experience an issue with your thermostatic valve it's easily accessible without removing the backplate.

Thermostatic valves have a safety override lock as standard.

Easy-level fixings allow for a faster and more accurate squaring up of the shower body than before, while the thermo cover protector also acts as a handy finished-wall depth guide.

Choosing your Showerhead

With our concealed shower valves you can create a luxurious minimalist showering solution.

- 1/ Choose your shower valve outlet requirement
- 2/ Decide where your shower head will be located (wall or ceiling mounted) and choose the shower arm to suit, unless you're opting for our Storm wall mounted solution
- 3/ Choose the shape and size of the showerhead and the finish option (where applicable)
- 4/ Finally, decide whether you need a riser rail or handshower to sit alongside.

Finish off by browsing through the Abode collection to find the perfect brassware pairings if you haven't already done so.

If a concealed shower valve is not your style, we have two wall mounted thermostatic shower kits which provide a full showering solution for simplicity.

STORM SHOWERHEADS

Adding more *practicality*

SLIDING RAIL
SHOWER

Great for all the family and ideal for body washing without wetting your hair if used alongside an overhead shower.

Alternatively, use as your main shower.

Remember you'll need a wall outlet for adding a riser rail with a concealed mixer

WALL OUTLET HANDSHOWER

A great addition for family homes, a quick freshen up, cleaning down the shower or even cleaning the dog!

CONCEALED THERMOSTATIC SHOWER VALVES I EXIT

Looking for a thermostatic valve option with great flow that only needs to operate one outlet, then look no further.

Harmonie Concealed Thermostatic Shower Valve (I Exit)

Zeal 3 Control Thermostatic Shower Valve (3 Exit)

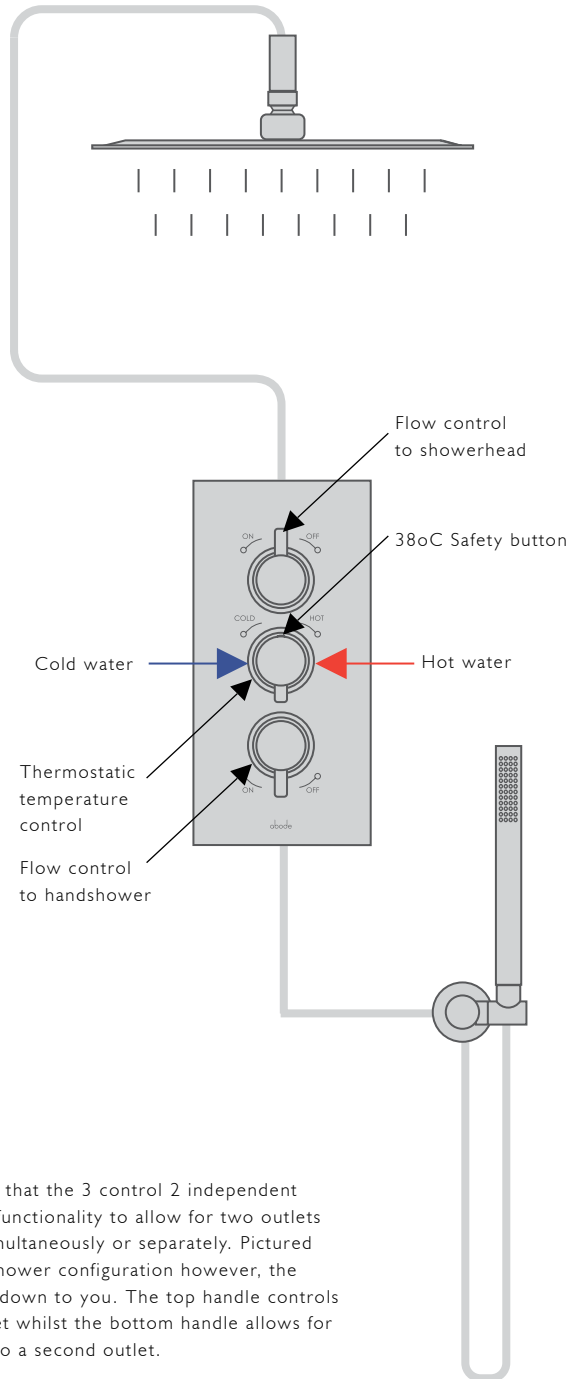

AB4571

Chrome

L310 • W150 • FD55-68 • P53

Require more from your showering experience, then select from either the 2 independent exit shower valve or the 3 exit shower valve from the Harmonie and Zeal ranges.

This example demonstrates that the 3 control 2 independent exit shower valve, has the functionality to allow for two outlets to be operational either simultaneously or separately. Pictured is a showerhead and handshower configuration however, the combination of products is down to you. The top handle controls the water flow to one outlet whilst the bottom handle allows for the control independently to a second outlet.

STORM SHOWERHEAD

Indulge yourself with the finest in showering technology, choose from either the ultimate 'wake-up call' or lose yourself in the world of the cascading waterfall and if that's not enough for total extravagance, you can have both functions working together. Sheer luxury!

This slimline bath overflow filler kit has been custom designed to provide a low pressure bath filling option.

Providing the latest in bathing technology, this kit not only provides the outlet for filling your bath but it also features an integrated overflow too.

A perfect solution as an alternative to a deck or wall mounted spout, if an uncluttered streamlined look is what you strive for.

WATER PRESSURE GUIDE

To ensure you achieve the best possible performance from your chosen brassware or showering product, you need to be able to identify your existing plumbing system and therefore your water pressure.

The following information provides a general overview on water pressures and a guide to ensure you choose the right product for you and your home.

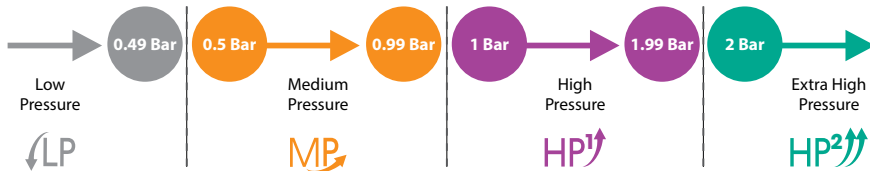

If you have 'LOW WATER PRESSURE' you should take care to choose a product that is suitable, otherwise you might find that the flow rate is poor. It will be difficult to achieve a mixed temperature.

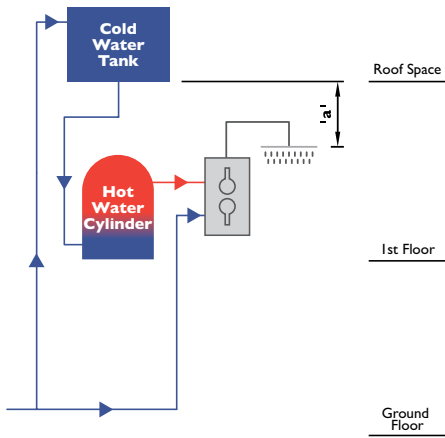

If you have 'HIGH WATER PRESSURE' you can choose any product with the same or lower pressure requirement.

As a general guide only, when connecting multiple products you should work to the product with the highest pressure rating.

Throughout our brochure we have highlighted by each product, a simple key outlining whether the product is low pressure (LP), medium pressure (MP) or high pressure (HP) along with stating the minimum pressure required to achieve the best result. The following diagram explains the pressure required for each level.

Please note all products marked LP and MP are also suitable for HP water systems.

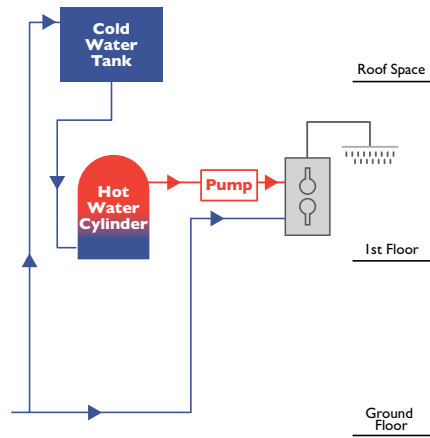

GRAVITY FED CYLINDER - VENTED SYSTEM

Most commonly found in older UK housing

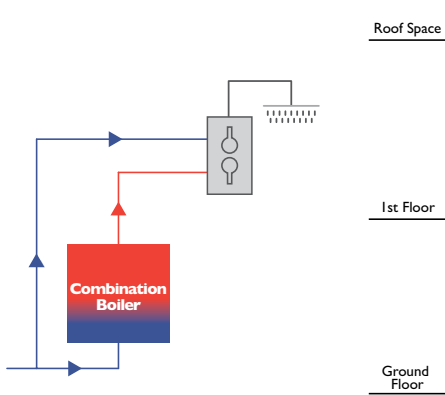

- Hot and cold pressures are typically unbalanced (the cold water pressure is higher than the hot)
- Cold water pressure is as per incoming mains
- Hot water pressure (head pressure) is distance 'a' in metres divided by 10. For examples if 'a' is 1 metre then the hot water pressure is approximately 0.1 bar
- This type of system is generally considered as low pressure

PUMPED GRAVITY FED CYLINDER - VENTED SYSTEM

Most commonly found in older UK housing that has been modernised

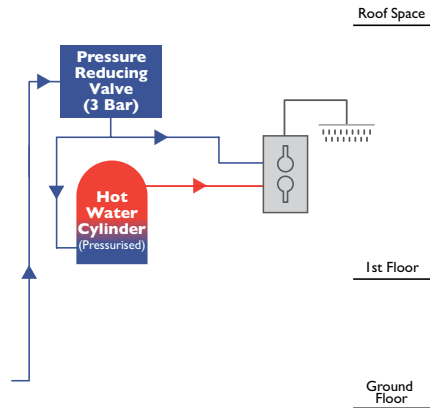

- Hot and cold pressures are typically unbalanced (depending on the cold mains pressure and the rating of the hot water pump)
- Cold water pressure is as per incoming mains
- Hot water pressure is as per the pump rating
- This type of system is generally considered as high pressure

COMBINATION BOILER - UNVENTED SYSTEM

Most commonly found in newer UK houses

- The 'combi' boiler is generally located in the kitchen
- Hot and cold pressures are typically almost balanced (the cold water pressure may be marginally higher than the hot)
- Cold water pressure is as per incoming mains
- Hot water pressure is as per incoming mains but generally reduced slightly due to pressure reducing valves, filters and flow limiters
- This type of system is generally considered as medium - high pressure

PRESSURISED CYLINDER - UNVENTED SYSTEM

Most commonly referred to by the brand 'Megaflo'

- The cylinder(s) can be located anywhere in the house.
- Hot and cold pressures are typically balanced (the hot and cold water pressures are equal)
- Hot and cold water pressure is typically 3 bar (as shown), otherwise the hot and cold pressure will be approximately the same as the incoming mains cold pressure
- This type of system is generally considered as high pressure

WARRANTY

COMPREHENSIVE 5 YEAR WARRANTY

In the unlikely event that you should experience any defect in the materials or workmanship of your new Abode product within 5 years of purchase, the purchaser's sole remedy shall be the replacement (at the manufacturer's discretion) of all or any part of the product that is defective. All working parts, valves and decorative surface finishes are guaranteed for a period of 5 years from purchase with the exception of specialist finishes such as Matt Black and Antique Brass which are guaranteed for 1 year. O rings are guaranteed for 1 year from the date of purchase provided that our advice concerning care has been observed and no scouring agents have been used. This is provided that the product has been used for normal domestic purposes and that the care, installation and maintenance instructions have been observed. The warranty extends to the original purchaser only.

CUSTOMER CARE

WATER REGULATIONS

All products should be installed in accordance with Local Water By Laws.

TECHNICAL SUPPORT

Choosing the right brassware for your home is an important choice as the product will be one of the most used in the home. Think about the style you require, the ease of use you are looking for, and then consider your existing water supply and the water pressure available to you. If you have any questions with regards to whether a product will be suitable for your application, please contact our Customer Service team or visit our website www.abodedesigns.co.uk for more details.

Your long-term satisfaction with the product is important to us. In the event that you require spare parts for your product, please contact our Customer Service team or visit our website for further technical information.

THE SMALL PRINT

Abode is a division of Norcros Group (Holdings) Limited.
