UNDERMOUNT CUT OUT

Important, to the fabricator / installer:
The cut out size indicated is flush with
the bowl edge with a minimum radius
where appropriate.
You should confirm with your client if
the worksurface cutout is to be cut
flush, inside or outside this suggested
perimeter size.
If you create the cutout smaller or
larger than the indicated size then
some accessories may not fit correctly.
All details are provided in good faith
and within the tolerances of the
manufacturing process.
We recommend that a test cutout is
made in scrap timber and checked
against the actual sink supplied before
committing to cutting the worksurface.
Abode can not accept liability for
problems or costs incurred by failure
to follow this advise.
