abode

distinctly

" Good kitchen tap design is not just about problem solving. It is about creating a beautiful and practical object that can stand out in your home but also integrate invisibly within your kitchen. It needs to deliver the right mixture of simplicity, elegance and innovation in equal measure. Despite knowing this, I cannot resist adding something personal to all my designs "

Paul Illingworth – Abode Designer

DESIGNED FOR YOU

The Abode ranges of kitchen mixertaps are created for people who want the perfect blend of design, performance and sheer quality in their homes. All Abode taps are lovingly hand finished, assembled and tested in our factories prior to the journey to the centre of your kitchen and your daily life.

DISTINCTLY DETAILED

Each and every detail on an Abode kitchen tap serves a purpose. Every form performs a function, beautifully. And at the heart of the design, precise engineering and manufacturing quality ensure smooth, almost effortless control.

" Making simple objects complicated is commonplace; making complicated functionality simple, incredibly simple, that's creativity "

FUNKTIONALITY ASSURED

All Abode products use the finest components, from silky smooth valve cartridges to our anti splash aerators at the end of the spout – all are designed to improve the experience of using our taps. These small things might not be immediately noticeable but add up, collectively to make a good design, great.

WATER AERATION

All mixers use spout aerators or flow straighteners to add bubbles to the water leaving your tap. These innovations in fluid technology keep your water flow in a controlled and distinctive pattern and eliminates splash back. Simple ideas, refreshing benefits.

VALVE CARTRIDGES

All Abode cartridge designs are tested for over 200,000 cycles before we will pass them for use within our taps. Why? Well this means that under normal use conditions your tap valves have proven that they will work for many years to come. The kitchen tap is the most used appliance in the kitchen, so valve quality assurance is essential.

FINISHING QUALITY

We use traditional artisan hand polishing techniques which ensure perfect blemish free surfaces and crisp edges. Our hand treatment does not end there – we use hand plating for Chrome, Nickel and Bronze plating. Yes we know it is more expensive to do it this way, but it means that the finish is richer, the plating deeper and ultimately more durable.

LUXURY PACKAGING

After taking all this care with the product, we want to ensure they reach you in perfect condition with all the parts that you will need for a seamless and straightforward installation. Fixing kits and tail pipes (with non return valves where necessary) are provided and designed to seat neatly within a standard 35mm tap hole. If the tap is heavy or tall, we also provide you with a tap stabilisation bracket in the box. We try and think of everything so you don't have to.

COMPREHENSIVE WARRANTY

Such is our dedication and reputation for quality, we offer a Comprehensive 5 Year Warranty on all our mixertap products, from our least to most expensive designs. We cover the materials used and valves for 5 years from the date of purchase.
For more details refer to page 174.

DISTINCTLY MODERN

Contemporary taps characterised by clean design lines, modern shapes and smooth effortless water control.

abode

" Good modern industrial design begins with simple honesty, asks difficult questions, benefits from supplier collaboration and ultimately arrives from trusting your intuition "

ALTHIA

Sheer simplicity, elegance and the perfect balance of features makes the Althia range a stand out choice. Whether you're looking for the latest on-trend finish, practicality or ease of use this range offers everything you are looking for.

ANTILA

The Gosford Monobloc takes its form from both traditional and contemporary styling cues. A tall sweeping swan neck spout and smooth tapered handles fuse with a clean symmetrical body to create a tap of modern day elegance. For a bolder traditional look, opt for the Antila with cylindrical crosshead handles to make a statement.

abode

DISTINCTLY CONTROLLED

Pronteau 4 IN 1 kitchen taps cater for your every need in the kitchen, simply, safely & instantly. This stylish range of products offers 80-98 degrees filtered steaming hot water, PH balanced crystal clear filtered cold water as well as your everyday hot and cold all from just one tap.

" Refreshing British design "

PRONTEAU 4 IN I kitchen taps are the latest innovation by Abode and cater for your every need in the kitchen, stylishly, simply, safely & instantly.

These newly patented 4 IN I mixertaps offer you all the benefits of our kitchen mixers with the addition of filtered cold and 80-98° filtered steaming hot water on demand.

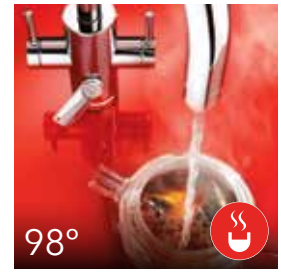
Refreshing British design.

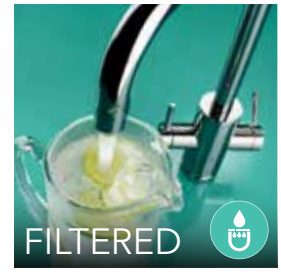
Instant steaming hot water – available safely, instantly and temperature controllable from 80-98 degrees, it delivers pH perfect filtered water for making teas, coffees and all of your cooking needs.

Instant filtered cold water – providing crystal clear filtered water on tap, improving the taste of cold drinks by filtering out hardness/limescale, discolouration and odours in your domestic water supply using advanced pH balancing filter technology.

Everyday cold water – supplies of cold water perfect for those common chores from watering plants to washing away bubbles.

Everyday hot water – perfect for filling the sink for those oversized items, washing hands and cleaning tasks.





PRONTEAU™ WATER THE WAY YOU WANT IT

PROJECT

Safety was at the forefront of our mind when the PRONTEAU 4 in 1 taps were designed. Steaming hot water is not brought without the use of our unique and innovative Hotkey™, hide this away at the top of cabinets to keep safety at a premium. The spout remains cool to the touch on this contemporary design.

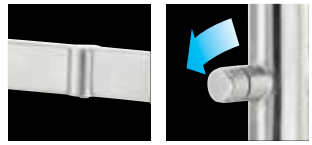
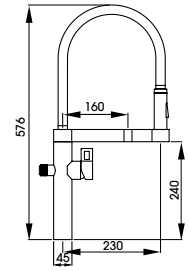
Min 1.5 bar pressure required



Turn the left dial anticlockwise for filtered water



Full filter starter kit supplied as standard.

SWICH AQUIFIER

A revolution in filtered water technology. The addition of the award winning Swich will allow you to simply and quickly convert any kitchen tap to supply filtered water, improving the overall taste, appearance and quality of your drinking water without needing to compromise on style. Swich from Abode is a completely unique way to get filtered water from any style of tap.

Swich is easy to install and use. Simply twist to divert the function of the cold water to refreshing filtered water and back again as required.

Choose from two designs, round or square and two finishes. To make the Swich solution perfect for your customer every time we also allow you to choose the filter type required. Choose from a classic filter, perfect for soft water areas or a high resin filter for hard water areas.

WATER FILTER CARTRIDGES

A selection of useful, functional and practical accessories are available from Abode including pull out handsprays in a variety of contemporary and classic styles, flow limiting valves, fast fit tail pipes and spout attachments that bring additional functionality to your mixertap. It's the little things that make the difference.

Aquifier Filter Facts

- Premium Filtration – 5 Micron filter density
- Capacity is 5600 litres / 1500 gallons (an average 6 months family usage)
- Specially formulated high absorption activated carbon media
- Proprietary scale inhibition system
- Simple, fast and secure 'SafeLock' cartridge mounting system for easy replacement
- 90 degree twist to open and release the cartridge. The opposite to lock.
- Replacement filter reminder service by email or post

Swich Filter Facts

TYPE	CODE	SUITABLE FOR LIMESCALE REDUCTION	CAPACITY*	REPLACEMENT PERIOD	SIZE
Classic Filter	**AT2058**	No	1000L**	At reaching capacity else 6 months recommended or 1 year maximum	300mm(L) × 64mm(dia)
High Resin Filter	**AT2059**	Yes	6000L		

* depends on incoming water quality and usage

** based on a typical hardness of 150ppm and a flow rate of 2 litres/minute, after this time the GAC element of the filter will be usable up to 4000L. The harder the water, the more it is used and the slower the flow rate the faster the resin will be exhausted.

RAPID FIT TAIL PIPES

Rapid Fit tail pipes have been developed by Abode in conjunction with John Guest International. The range of 600mm long wide bore flexible LLDPE tail pipes and 'Speedfit' connection parts enable the simple DIY installation of all the the monobloc and single lever mixertaps in the abode range. The rapid fit tail pipes take all the soldering and fiddly plumbing away and leaves a simple and speedy installation process.

The rapid fit tails are available in both 10mm and 12mm connection sizes. Check the icon next to the product when ordering to ensure you have the correct inlet size.

10 12

AT1167 10mm Fast Fit Tails [£26.50]
AT1168 12mm Fast Fit Tails [£26.50]

FLOW CONTROL VALVE

When installed this simple device limits your maximum water usage to 6 litres per minute when your tap is operating fully, resulting in a reduction of water usage and therefore your water and heating bills. The valve has a built in non return valve feature so can be used in conjunction with any Abode tap. For more information on reducing water and energy wastage visit our website www.abodedesigns.co.uk/flow

WARRANTY & CARE

WARRANTY

Comprehensive 5 Year Warranty

In the unlikely event that you should experience any defect in the materials or workmanship of your new Abode mixer within 5 years of purchase, the purchaser's sole remedy shall be the replacement (at the manufacturer's discretion) of all or any part of the product that is defective. All working parts and valves are guaranteed for a period of 5 years from purchase. Decorative surface finishes and O-rings are guaranteed for 1 year from the date of purchase provided that our advice concerning care has been observed and no scouring agents have been used. This is provided that the mixer or tap has been used for normal domestic purposes and that the care, installation and maintenance instructions have been observed. The warranty extends to the original purchaser only.

Caution

Repeated release of boiling hot water directly into coloured sinks can in extreme cases cause crazing and even cracking. Therefore we recommend great care is taken not to release the water directly on to the sink surface at full temperature.

CUSTOMER CARE

Water Regulations

All products are designed in accordance with European Water Regulations and are manufactured to WRAS or other applicable European standards. All products should be installed in accordance with Local Water Bye Laws.

Technical Support

Choosing the right mixer tap for your home is an important choice as the tap is not only the most architectural item in your kitchen, but also the most used. Think about the style you require, the ease of use you are looking for, and then consider your existing water supply and the water pressure available to you. If you have any questions with regards to whether a tap will be suitable for your application, please contact our technical support team or visit our website **www.abode.eu** for more details.

Your long-term satisfaction with the product is important to us. In the event that you require spare parts for your tap, please contact our technical support team or visit our web site for further technical information.
